

## Installation Contract 2025

**Installation Fee:** 1.5 times the original list price of the nursery plant purchase. (Example: A \$400.00 tree will cost \$600.00 for the installation fee) \$400.00 for the tree and \$600.00 for installation fee totaling \$1,000.00 plus tax.

**Minimum plant value of \$400.00.** Installations are done from April through October.

Included in the fee: 100% 1 year guarantee, pre-installation site inspection, delivery, installation, bio-tone starter fertilizer and soil amendments as needed for quality root growth, shredded hardwood mulch applied to new plant for water conservation, removal, and disposal of soil debris from planting, and recycling of soil and containers.

Planting procedures may vary based on soil and site conditions. Please notify Lurvey within 48 hours after planting if you are dissatisfied with the installation. Acts of nature including extreme weather, neglect of installed plants, as determined by Lurvey's install contractor will void this guarantee.

- Trees and shrubs are living things and require care of watering, insect/disease/animal damage control. Care of newly planted nursery stock is the buyer's responsibility and lack of care will void this guarantee.
- Any plant health concerns of the installed plants in the first year should be reported to the garden center plant health staff. A **Plant Health Check** will be initiated, and the Lurvey's install contractor will call you within 7 business days to schedule an appointment to inspect the plant. If authorization is given, visit the garden center to make a selection. There is no time limit for authorized replacement. Multiple plant health checks are subject to additional fees.
- A tree, evergreen, or shrub must be at least 50% dead to qualify for the one time replacement. Authorization for replacement can only be made by Lurvey's installer and/or the plant health dept. Please allow 48 hours after your plant health check for a replacement authorization to be sent to Lurvey Garden Center.
- If you request replacement in a new location, a new installation fee will be charged.
- Replacements are to be the same size/variety as originally purchased and will be planted in the same location unless we recommend otherwise. If the price of the identical replacement nursery stock is either greater or less than the original price, there is no charge or credit to the buyer. If the buyer elects to replace the dead tree/shrub with another variety, may do so if it is of equal or lesser value than the original purchase price. No credit is given for lesser-priced plant or a plant on sale. There will be an additional charge for both plants and install if a more expensive plant is selected. The replacement planting is guaranteed for 30 days. If a replacement plant is not available, the warranty will be extended to the next year.
- Healthy nursery stock will not be replaced for design or aesthetic reasons.
- Full removal of plant cage and burlap is not recommended and may void guarantee.
- Lurvey installer does not remove existing large stumps or large trees.
- Fees for additional projects requested from customer will be billed by and due to the installer. Additional projects are not guaranteed by Lurvey.
- 15% restocking fee will apply for returned plants on installation day that can't be planted due to site unprepared.
- **Planting locations more than 20 miles from the Des Plaines store will be assessed a \$150.00 travel fee.** which includes purchases made at Lurvey's Volo and Park City locations.
- Scheduled installation and site inspection could be delayed due to inclement weather. Both are done Monday thru Friday approximately 8am. to 3:30pm.

I have read and agree to the terms and conditions of this installation contract.
