

Andersons Crabgrass Preventer Plus Lawn Food 26-0-6

- Contains pre emergent weed control and fertilizer
- Dimension, the active ingredient will protect the lawn from grassy and broadleaf weeds for 4 months
- The 26-0-6 fertilizer has both quick and slow release nitrogen for fast green up and extended feeding. 17 lb. bag, 6,000 sq.ft. coverage
- Apply in spring prior to weed germination, may also be applied in fall
- Use only on established lawns, lawns weakened by mechanical injury, pests, excessive temperatures, lack of moisture, may increase chances for turf injury
- Apply within a few days after mowing and do not mow again until grass has been watered well to dissolve the fertilizer granules
- Can not overseed lawn until 4 months after application
- Do not apply to flowers, vegetables, or fruit trees
- Grassy weeds controlled or suppressed are annual bluegrass and ryegrass, barnyard grass, crab grass, crowfoot grass, goose grass, foxtail, perennial ryegrass, yellow foxtail
- Broad leaf weeds suppressed are bittercress, chickweed, purslane, corn speedwell, henbit, pineapple weed, spurge, yellow wood sorrel
